PROJECTS

SkyProton Agent System (Spring Boot + Golang + Next.js + MySQL + Redis + Weaviate + LangGraph)
- GitHub: rag-agent-system
- Website: agent.skyproton.com

- Architected a multi-agent workspace unifying RAG chat, workflow automation, financial monitoring, and travel planning, extensible via MCP tools and custom skills.
- Designed a workflow engine with orchestrator, team, and graph modes that executes agents in resource-limited Docker sandboxes, with visual graph composition and step-level run replay.
- Implemented scheduled agents on a Redis-backed durable task queue for real-time crypto, stock, and DeFi price alerts and recurring workflows.

Budget iOS APP (Swift + SQLite + CoreData)
